

In this second example, this time in the key of A minor, you will notice that Vivaldi does not sharpen the seventh on **VII** and **III**. This avoids **VII** being diminished (so we get a G major chord instead of a G# diminished) and **III** being augmented (so we get C major instead). It is quite common to miss out the sharpened seventh in minor keys to avoid awkward chords in this way.

## Ascending sequence of falling fifths (or descending fourths)

This uses the same basic progression as a circle of fifths, but instead of making a continuous chain, you take your initial chord sequence of **I – IV** and then sequence it **up** rather than down a step each time. As with a circle of fifths, it is usual for the melodic material to be sequenced in the same way. This type of sequence does not usually take us back to our starting point.

Handel, *The Messiah*, Part I no. 12 (Chorus): “For unto us a child is born”

The image shows a musical score for a soprano part and piano accompaniment. The soprano line has the lyrics: "For un-to us a Child is born, un-to us a Son is giv-en, un-to us a Son is giv-en." Below the piano part, Roman numeral chord analysis is provided for the key of G major: **G: I IV ii V iii vi iv viib I V**. Brackets are drawn under the first four chords (I, IV, ii, V) and the last four chords (iv, viib, I, V) to indicate the repeating sequence.

Note how in this example Handel repeats the sequence for a fourth time (**iv-vii**) but speeds up the harmonic rhythm so that he can finish with a more emphatic imperfect cadence (**I - V**)

## Ascending sequence of falling thirds

A final sequence that was often used in the Baroque era in particular is the series of falling thirds (another strong harmonic progression). In the example below, as is very common, Corelli puts the second chord in the sequence each time in first inversion so that bass note stays the same as for the previous chord.

The image shows a musical score for a single melodic line. Below the staff, Roman numeral chord analysis is provided: **A: I vib ii viib iii Ib IV iib V iib V (I)**. Brackets are drawn under the first four chords (I, vib, ii, viib), the next three (iii, Ib, IV), and the final two (iib, V) to indicate the sequence.

Long sequences driving towards a cadence are a hallmark of Corelli’s style and in this example, you might notice that he actually starts this sequence at the beginning of the line on **IV**, extending the passage to cover a full octave.

## Descending first inversion chords

A simpler type of sequence just follows a descending series of first inversion chords as shown below

*Haydn Symphony No. 104, first movement*

159

The musical score consists of two systems. The first system has two staves (treble and bass) and shows the beginning of the sequence with a fermata over the first measure. The second system has a grand staff (treble, middle, and bass) and continues the sequence with a piano (p) dynamic marking.

G: IV6      iii6      ii6      I6      e: ii6      i6      vii6      vi6
